Intealth® Board Elects New Trustees for 2027

Intealth has elected three new members to serve on its Board of Trustees. The new members include two trustees, who will serve four-year terms, and one resident trustee, who will serve a two-year term. The new trustees, whose terms will begin in January 2027, are Rupinder (Rupi) Bhamra, MBA, who joins the Board as a public member; Oyebode (Bode) A. Taiwo, MD, MPH; and Resident Trustee David K.A. Donkor, MD. Their selection follows an open call for applications that concluded in July.

"As Intealth looks ahead to its next chapter, the Board's work has never been more important," said Craig Brater, MD, Chair of the Intealth Board of Trustees. "Mr. Bhamra, Dr. Taiwo, and Dr. Donkor bring perspectives that span technology and data governance, global health and physician training, and the lived experience of international medical graduates. Their insight will help guide Intealth as it builds on its foundation and pursues new opportunities to serve the international medical community."

This year also marks the conclusion of service for Resident Trustee Ricardo A. Serrano, MD, MBA, MSc, who joined the Board in 2025 and has now completed his residency training. A psychiatrist who practiced in his home country of Chile before pursuing residency in the United States, Dr. Serrano brought firsthand experience of the international medical graduate journey to his Board service.

"Dr. Serrano has been a passionate advocate for residents and international medical graduates, and his perspective as a trainee enriched the Board's discussions," said Eric S. Holmboe, MD, President and CEO of Intealth. "We are deeply grateful for his service and look forward to engaging with him in the years ahead."

Incoming Trustees

Rupinder (Rupi) Bhamra, MBA

Mr. Bhamra is Head of Relationship Management and CRM Strategy, Data and AI, for Commercial Banking and Corporate and Investment Banking at Wells Fargo. He is a global technology and data executive with more than 25 years of experience leading digital transformation, data platform modernization, and enterprise AI strategy at

leading financial institutions. Previously, he spent six years as Managing Director and Global Head of Corporate Technology at MSCI, where he designed the firm's first enterprise data warehouse, built an end-to-end data governance framework, established an AI Center of Excellence, and presented technology and AI strategy to the firm's Board of Directors. He also served as Global Head of the Client Reporting Platform at Morgan Stanley Investment Management, where he led the firm's technology organization in India, and spent more than a decade in technology leadership at Vanguard. Mr. Bhamra holds a Master of Business Administration from Drexel University and a Bachelor of Engineering in Electrical Engineering from The Maharaja Sayajirao University of Baroda in India.

Oyebode (Bode) A. Taiwo, MD, MPH

Dr. Taiwo is Senior Vice President and Chief Medical Officer at 3M, where he provides strategic medical leadership for global worker health and well-being, occupational and environmental medicine, clinical governance, health policy, and health-related enterprise risk. He is a physician executive, educator, and public health leader with more than 30 years of experience in academic medicine, global health strategy, and health care leadership. Before joining 3M, he was a faculty member at Yale University School of Medicine, where he directed the Yale Occupational and Environmental Medicine Fellowship Training Program for more than a decade and held multiple roles in graduate medical education, trainee selection, and physician mentoring. He continues to support physician training through elective rotations, resident precepting, and guest lecturing. Dr. Taiwo earned his medical degree from the College of Medicine, University of Lagos, in Nigeria and a Master of Public Health in Epidemiology from the University of Alabama at Birmingham. He completed a rotational internship at General Hospital, Port of Spain, in Trinidad, an internal medicine residency at Meharry Medical College, and a fellowship in occupational and environmental medicine at Yale.

David K.A. Donkor, MD

Dr. Donkor, who joins the Board as a Resident Trustee, is a second-year internal medicine resident at Wellstar Spalding Medical Center in Griffin, Georgia. An international medical graduate from Ghana, he earned his medical degree from the University for Development Studies. Before beginning residency in the United States, he practiced medicine in Ghana, where he moved from frontline clinical care into leadership roles in clinical coordination, emergency care, and hospital administration. He also served on a hospital management board and a drug and therapeutics committee. At Wellstar, he serves as Treasurer of the Residency Council and as a member of the Research Committee, and he contributes to a quality

improvement initiative focused on reducing heart failure readmissions. His research interests include cardiovascular outcomes and health care disparities. Dr. Donkor was named a 2026 Wolfson Scholar by the ABIM Foundation. He is co-founder of BisaDoctor, a digital health initiative that improves access to chronic disease care in Ghana, and founder of Five Hearts Foundation, a community nonprofit focused on preventive health education. He plans to pursue fellowship training in cardiovascular disease.

About Intealth

Intealth is a private, nonprofit organization dedicated to advancing quality in health care through medical education, assessment, certification, and the verification of professional qualifications. Building on decades of experience and the established expertise of ECFMG and FAIMER, Intealth supports international medical graduates throughout their professional journeys and collaborates with medical educators, institutions, regulatory authorities, and other stakeholders around the world. Through its programs, services, research, and partnerships, Intealth promotes excellence in medical education and training, facilitates pathways to professional practice, and contributes to a better understanding of the global physician community.
